Design Process

LIST

Created a list of requirements sorted into page names

RESEARCH

Researched some portfolios online to get some ideas

MOCK UP

Drew some ideas on paper and created a wireframe

PICTURES

Sourced free photos and created icons and blog posts using canva

Development/Build Process

FAVORITE PARTS

Contact page and Blog Page. It was fun working with the layout and icon/picture size.

BLOG PAGE

Grid/Flexbox would not place pictures correctly. This was a HTML issue not CSS

DATA

How much of my data did i want on the internet? Was ok with resume but not ok with phone number

BUILD PROCESS

HTML first then CSS. CSS and responsive web design more challenging than i thought.
